-

St. Mary's University, San Antonio, TX

-

- Minor of Mathematics

Distinguished Graduate (Fall 2025), Engineering Dept. Scholarship (Spring & Fall 2025); 1st Place CS Symposium Project Presentation & Poster (Fall 2024); Trustee Scholarship (2020–2024)

St. Mary's University Engineering Department, San Antonio, TX

- Prototype Microsoft HoloLens 2 applications in C#/NET (*StereoKit*) for UI, 3D interaction, and data-driven views supporting clinical education/diagnostics.
- Collaborating with cross-disciplinary stakeholders to turn requirements into working software iterated via sprints and demo feedback.
- Managing the Human-Centered Design Lab: equipment upkeep, experiment setup, technical troubleshooting, and administrative support for faculty/lab users.
- Tutor undergraduate students in Object-Oriented programming and Java development; organized and executed outreach events to engage prospective students and showcase lab capabilities.
- _____: Guide a Cornell undergraduate student on an eye-tracking + LLM analysis workflow; automated metrics extraction and summary tables in Python/Jupyter Notebook.

Adorn Jewelry, San Antonio, TX

- Led a team of eight; oversaw high-end merchandise transactions; coordinated inventory, scheduling, sales operations, and promotions.
 - Integrated JewelMATE Retail Software with Point-Of-Sale machine which led to a more efficient checkout experience for the customer.
 - Trained up to four employees at a time in sales, service, and customer experience through individual walk-throughs.
-

“A Framework for Mixed Reality within Healthcare”, Student, St. Mary's University

- Perform R&D on a framework to enhance healthcare diagnostics, education, and prosthetic training using Mixed Reality.
- Building interactive 3D scenes, user interfaces, and animations for anatomically accurate models.

What's It Worth, Student, St. Mary's University

- Programmed a software application using a .NET Framework in C# that allows users to instantaneously calculate the material price of their jewelry and enables them to track the growth of their investments.
- Developed contemporary API to scan “Kitco.com” to retrieve the JSON code of the most current day price of precious metals within the New York Stock Exchange and decipher the raw code to store within Microsoft SQL Server.

, Student, St. Mary's University

- Coded a multi-threaded chat room server in Python that allows multiple client GUI's to allow parallel and asynchronous communication between users; Designed a client GUI using the TKinter library in Python run through command line.
- Rebuilt the chatroom as a web-based system (HTML/CSS/JavaScript + Node.js) and implemented AES-256 encrypted messaging with RFID/NFC tag-based access control (scan tag → credentialed login).

Java++, Student, St. Mary's University

- Engineered language and compiler called *Java++* from scratch which takes my favorite aspects of C++ and Java and combines them to make a purely functional and simple coding environment for new programmers.
-

- C, C++, C#, CSS, HTML, Java, JavaScript, Python, SQL
- Anaconda, Dev-C++, Eclipse, Gamemaker Studio, Git/GitHub, IntelliJ IDEA, JavaFX, Jira, Jupyter Notebook, Microsoft Office, Node.js, React Native, Spyder, Visual Studio, VS Code
- AWS, Microsoft Azure, SQL Server, SQLite
- MathWorks MATLAB (Certified), VirtualBox
- Alpine Linux, Ubuntu, Windows
- Agile, Kanban, Scrum, Software Development Life Cycle (SDLC), Traditional Waterfall
- English (Fluent), Arabic (Fluent), Farsi (Fluent), Spanish (Intermediate)
