EDUCATION

Master of Science in Software Engineering, *St. Mary's University*

December 2025

- **Cumulative GPA: 4.00**

Bachelor of Science in Computer Science, *St. Mary's University*

December 2024

- Minor in Mathematics

Awards: Distinguished Graduate (Fall 2025); Engineering Department Scholarship (Spring & Fall 2025); 1st Place CS Symposium Project Presentation & Poster (Fall 2024); Trustee Scholarship (2020–2024)

EXPERIENCE

Software Engineering Graduate Research Assistant

January 2025 – December 2025

St. Mary's University Engineering Department, San Antonio, TX

- Prototyped Universal Windows Platform applications for mixed reality devices and designed user interfaces for 3D interaction and data driven healthcare visualization.
- Collaborated with cross disciplinary stakeholders to translate requirements into working software iterated through sprint-based development and demo feedback.
- Tutored a Cornell undergraduate student on an eye tracking and LLM analysis workflow; automated metrics extraction and summary tables in Python using Jupyter Notebook.

Store Manager

June 2018 – January 2025

Adorn Jewelry, San Antonio, TX

- Led a team of eight; oversaw high-end merchandise transactions; implemented new technologies; coordinated inventory, scheduling, sales operations, and promotions.
- Integrated JewelMATE Retail Software with the POS system, improving checkout efficiency and customer experience.

PROJECTS

“Systems Simulation” Mixed Reality Framework, *Graduate Researcher, St. Mary's University*

January 2025 – December 2025

- Developed a reusable mixed reality framework in C#/.NET using StereoKit for interactive 3D system visualization on Microsoft HoloLens 2.
- Designed the prototype for my graduate thesis, including interactive UI, model controls, and a modular architecture to support multiple learning scenarios.

“What's It Worth?” Desktop Application, *Student, St. Mary's University*

May 2024 – December 2024

- Programmed a Windows desktop application in C#/.NET that allows users to instantaneously calculate the current market value of their jewelry and enables them to track the growth of their investments.
- Built a web scraper to extract daily precious-metal prices from Kitco and store price history in SQL Server; integrated the IDEX REST API to pull diamond pricing data.

“RFID Chatroom” Web Application, *Student, St. Mary's University*

January 2024 – December 2024

- Coded a full-stack web-based chat application using HTML/CSS/JavaScript, Node.js, and WebSockets with AES-256 encrypted messaging and RFID/NFC tag-based access control.
- Expanded an earlier multi-threaded chat room server in Python that supports multiple client GUIs and parallel, asynchronous communication between users.

“Java++” Programming Language, *Student, St. Mary's University*

May 2023 – December 2023

- Created a programming language and compiler called Java++ from scratch, applying C++ and Java concepts to create a simple, functional coding environment for new programmers. Implemented in C and C++.

PUBLICATIONS & PRESENTATIONS

- **“A Mixed Reality Platform for Interactive Learning in Healthcare and Engineering Education,”** *ASEE Gulf Southwest Conference*, March 2026; **Best Student Paper, 3rd Place**; Published in conference proceedings.
- **“A Framework for Mixed Reality within Healthcare Education,”** Master's Thesis, *St. Mary's University*, December 2025; Published on ProQuest.

SKILLS

- **Programming Languages:** Bash, C, C++, C#, HTML/CSS, Java, JavaScript, Python, SQL
- **Frameworks & Interfaces:** JavaFX, .NET, Node.js, React.js, RESTful APIs, UWP, WebSockets, Windows Forms
- **Development Tools & Platforms:** Anaconda, Eclipse, Git & GitHub, IntelliJ, Jira, Jupyter, MathWorks MATLAB (Certified), Microsoft 365, VS Code, Visual Studio
- **Data & Cloud Technologies:** AWS, Microsoft Azure (AZ-900 Certified), SQL Server, SQLite
- **Operating Systems & Deployment:** Arch Linux, Alpine Linux, Cloudflare, Docker, Nginx, Ubuntu, Windows, VirtualBox
- **Methodologies:** Agile, CI/CD, Kanban, Scrum, Software Development Life Cycle (SDLC), Traditional Waterfall
- **AI & LLM Tools:** Experience in AI-enhanced development workflows using LLMs such as Gemini, Claude, and ChatGPT for rapid prototyping, documentation, and unit test generation.
- **Languages Spoken:** English (Fluent), Arabic (Fluent), Farsi (Fluent), Spanish (Intermediate)
